Workshop "Metastability and stochastic processes" September 21st-23rd 2011, Ecole des Ponts ParisTech.

Preliminary list of posters

Manuel Athènes	Kinetic Monte Carlo algorithm for complex network systems: first-passage times by compound randomization
Bertrand Cloez	On the long time behavior of structured populations
Olivier Collet	How does water fold proteins so fast
Matthew Dobson	A Langevin Dynamics for Systems Immersed in a Linear Nonequilibrium Flow
Dasha Loukianova	Spectral condition, hitting times and Nash inequality
Fouad Maouche	Exponential bounds for the solution off an ill posed problem with random errors
Andre Schlichting	Spectral Gap Estimates at Low Temperature by Decomposition of the Energy Landscape
