Gabriel Stoltz

French nationality.
Born 27th may 1979.
Married, 2 children

Professional address:
CERMICS - Ecole des Ponts ParisTech
6/8 av. Blaise Pascal - Cité Descartes
77455 Marne-La-Vallée, FRANCE

Tél. : +33 1 64 15 35 20
email: gabriel.stoltz@enpc.fr
Web page: http://cermics.enpc.fr/∼stoltz

Positions & Education

June 2016-	Professor at Ecole des Ponts ParisTech
June 2012	Habilitation thesis defended
September 2008 -	Researcher at CERMICS (Ecole des Ponts ParisTech, France) & MATHERIALS project, Inria
2007-2008	Post-doc at IMPMC, University Paris 6 Numerical methods for quantum thermal transport (supervised by Francesco Mauri)
2004-2007	PhD in applied mathematics "Some mathematical methods in molecular simulation" Advisor: Eric Cancès, CERMICS
2002-2004	Ecole Nationale des Ponts et Chaussées, Marne-La-Vallée
	MS in Numerical Analysis, Université Paris VI
1999-2002	Ecole polytechnique, Paris specialization in Mathematics

Scientific Experience

2008 (1.5 month)	Junior program "Computational Mathematics" (HIM, Bonn, Germany)
2005 (3 months)	Program "Bridging time and length scales in materials science and biophysics" (IPAM, UCLA, Los Angeles, USA)
2004 (6 weeks)	Summer School CEMRACS (Marseille, France). *Field of research*: Conformational molecular dynamics in drug design. *Supervisor*: Eric Cancès.
2003 - 2004 (8 months)	Training period in industry (CEA, French Atomic Energy Authority). *Field of research*: Upscaling issues in molecular dynamic simulations of shock waves. *Supervisor*: Claude Le Bris.
2002 (3 months)	Final training period of the Ecole polytechnique, at ETH Zürich. *Field of research*: Hardy Spaces and some applications to the Euler equation. *Supervisor*: Tristan Rivière.

Prizes and awards

2008	PhD prize from Ecole des Ponts
2002	Rivot medal from the French Academy of Sciences (which honors academic performance in studies at Ecole polytechnique)

Languages

English	fluent
German	fluent

Computer Skills

Programing languages	C/C++, Python

Invited lectures and courses

- High Dimensional Sampling and Applications, 2h lecture + 1h seminar, MAC-MIGS tutorial (Edinburgh, November 2022)
- Constructing collective variables using Machine Learning and free energy biased simulations, 3h lecture + 3h hands-on session at AlgoSB Winter school 2021 (with Tony Lelièvre and Thomas Pigeon; November 2021)
- Sampling high-dimensional probability distributions and Bayesian learning, 6h lecture at doctoral school UM6P (Morocco, November 2019)
- From a microscopic description of matter to a macroscopic one on a computer: computational statistical physics, 6h lecture at the CIMPA Summer School on Multiscale Computational Methods and Error Control (IIT Kanpur, India, July 2017)
- A mathematical introduction to steady-state nonequilibrium systems, 2h lecture at the Spring school of the DFG collaborative research centre 1114 on Molecular Dynamics (Bad Belzig, Germany, April 2016)
- An introduction to molecular dynamics, 2h lecture at MOMAS meeting (CIRM, Marseille, November 2014)
- Molecular simulation: A mathematical introduction, 4h lecture at the School "Multi-scale and Multi-field Representations of Condensed Matter Behavior" (Pisa, November 2013)
- Molecular dynamics: a mathematical introduction, 4h lecture at the School "Longtime limits of stochastic models" (CIRM, Marseille, February 2013)

Oral presentations (conferences and workshops)

- Optimizing the diffusion for sampling with overdamped Langevin dynamics, program "Probabilistic sampling for physics" at Institut Pascal (Orsay, France, September 2023)
- Error estimates and variance reduction for nonequilibrium stochastic dynamics, workshop "Nonequilibrium molecular dynamics" (Birmingham, United-Kingdom, May 2023)
- Coarse-graining and efficiently sampling with autoencoders, Workshop "Rare event sampling" (BRIN center, University of Maryland, February 2023)
- Coarse-graining and efficiently sampling with autoencoders, MASIM ML & sampling workshop (Paris, December 2022)
- Reducing the mini-batching error in Bayesian inference using Adaptive Langevin dynamics, workshop "Machine-learning assisted scientific computing" (Paris, October 2022)
- Error estimates and variance reduction for nonequilibrium stochastic dynamics, plenary talk at MCQMC 2022 (Linz, Austria, July 2022)
- Numerical methods for the linear response of nonequilibrium stochastic dynamics, CNRS-ICL workshop (London, UK, July 2022)
- Coarse-graining molecular systems with autoencoders and adaptive sampling, NOMATEN International Conference on Materials Informatics (Warsaw, Poland, June 2022)
- Quantifying errors in the computation of transport coefficients, CECAM workshop "Numerical Techniques for Nonequilibrium Steady States" (Mainz, Germany, April 2022)
- Hypocoercivity without changing the scalar product, Workshop ANR EFI (Paris, France, October 2021)
- Removing the mini-batching error in Bayesian inference using Adaptive Langevin dynamics, Workshop "On Future Synergies for Stochastic and Learning Algorithms" (CIRM, France, October 2021)

- Computational statistical physics and hypocoercivity, Summer school "From kinetic equations to statistical mechanics" (St Jean de Monts, France, June 2021)
- Machine learning for coarse-graining molecular systems, MAC-MIGS afternoon on Mathematical Research Topics in Machine Learning (online, June 2021)
- Finding reaction coordinates with machine learning techniques for free energy computations, SIAM Materials (online, May 2021)

- Hypocoercivity with Schur complements, Hypocoercivity workshop, Heilbronn Institute (Bristol, UK, March 2020)
- Removing the mini-batching error in large scale Bayesian sampling, Bayes 2020 (Gainesville, Florida, USA, January 2020)
- Error estimates in molecular dynamics, QuAMProcs meeting (Bordeaux, France, November 2019)
- Hybrid Monte Carlo methods for sampling on submanifolds, SciCADE 2019 (Innsbruck, Austria, July 2019)
- Convergence of Adaptive Langevin dynamics, ICIAM 2019 (Valencia, Spain, July 2019)
- Molecular dynamics by applied mathematicians, Rencontres prospectives RFCT, (Nantes, France, June 2019)
- Convergence of Adaptive Langevin (and other dynamics) using hypocoercivity, CIB workshop "Computational mathematics for model reduction and predictive modelling in molecular and complex systems" (Lausanne, Switzerland, May 2019)
- Some mathematical challenges in molecular dynamics, CECAM workshop "Microscopic simulations: forecasting the next two decades" (Toulouse, France, April 2019)
- Reducing error in molecular dynamics, Workshop Cambridge/Labex MMCD (Ecole des Ponts, France, April 2019)
- Molecular simulation and the numerical microscope, Journées scientifiques Inria 2018 (Bordeaux, France, June 2018)
- Efficient sampling of nonequilibrium systems, Focus Program on Nanoscale Systems and Coupled Phenomena: Mathematical Analysis, Modeling, and Applications (Fields institute, Toronto, Canada, May 2018)
- Parametrizing coarse-grained molecular systems from ab-initio computations: some elements, IPAM workshop "Collective Variables in Classical Mechanics" (Los Angeles, USA, October 2016)
- Error estimates for transport coefficients in molecular dynamics, MMM16 (Dijon, France, October 2016)
- A mathematical study of the GW^0 method for computing electronic excited states of molecules, SIAM Materials (Philadelphia, USA, May 2016)
- Error estimates for transport coefficients in molecular dynamics, SIAM Materials (Philadelphia, USA, May 2016)
- Error estimates on the computation of transport coefficients, workshop "Challenges in statistical mechanics: from mathematics to molecular dynamics to technological applications" (Imperial College London, UK, December 2015)
- Using Metropolis schemes to estimate correlation functions, meeting of the GdR ISIS (Telecom Paris, November 2015)

- Error estimates on the computation of transport coefficients, Program "Nonequilibrium Statistical Physics 2015" (ICTS, Bangalore, India, November 2015)
- Error estimates on the computation of transport coefficients, workshop NASPDE 2015 (Inria Sophia-Antiopolis, France, September 2015)
- Error estimates on the computation of transport coefficients, workshop "Free-energy calculations. A mathematical perspective" (BIRS at Oaxaca, Mexico, July 2015)
- Langevin dynamics with space-time periodic nonequilibrium forcing, workshop "Progress in nonequilibrium statistical mechanics" (Nice, France, June 2015)
- Energy (super)diffusion for systems with two conserved quantities, workshop "Analytic approaches to scaling limits for random systems" (HIM, Bonn, January 2015)
- Langevin dynamics with space-time periodic nonequilibrium forcing, 10th AIMS conference on Dynamical Systems, Differential Equations and Applications (Madrid, Spain, July 2014)
- An overview of numerical techniques for the simulation of quantum systems, workshop "Theoretical and Numerical Aspects of Quantum Transport" (Aalborg, Denmark, April 2014)
- Reponse of crystals to time-dependent perturbations, workshop "Mathematical and Numerical Analysis of Electronic Structure Models" (Berlin, April 2014)
- Error estimates in the numerical computation of transport coefficients, Oberwolfach meeting "Large Scale Stochastic Dynamics" (Germany, October 2013)
- The microscopic origin of the macroscopic dielectric permittivity of crystals, QMaths12 (Berlin, September 2013)
- The microscopic origin of the macroscopic dielectric permittivity of crystals, GDRE ConEDP Meeting 2013 (Grenoble, April 2013)
- The microscopic origin of the macroscopic dielectric permittivity of crystals, Workshop on "Quantum and Atomistic Modeling of Materials Defects" (IPAM, Los Angeles, October 2012)
- Time evolution of defects in crystals, Workshop on "Mathematical and Numerical Analysis of Electronic Structure Models" (Beijing, China, June 2012)
- Free energy techniques in Bayesian Statistics, CECAM workshop "Free energy calculations: From theory to applications" (Marne-la-Vallée, June 2012)
- Computation of transport properties by molecular dynamics, EPSRC Multiscale systems workshop (Warwick, UK, December 2011)
- Computation of transport properties by molecular dynamics, CECAM discussion on modeling of matter (Paris, December 2011)
- Nonequilibrium shear viscosity computations with Langevin dynamics, Minisymposium on mathematics in materials science, Beijing (China, September 2011)
- (Non)Equilibrium computation of free energy differences using Langevin dynamics, Molecular Kinetics, Berlin (September 2011)
- (Non)Equilibrium computation of free energy differences using Langevin dynamics, ICIAM, Vancouver (Canada, July 2011)
- Adiabatic switching for degenerate ground states, Summer school on Electronic Structure Analysis and Computation (Shanghai Jiao Tong University, June 2011)
- Thermal transport in one-dimensional systems: Some numerical results, Oberwolfach meeting "Large Scale Stochastic Dynamics" (Germany, November 2010)
- (Non)Equilibrium computation of free energy differences using Langevin dynamics, Multiscale Molecular Modelling workshop (Edinburgh, United-Kingdom, June 2010)

- Computational statistical physics: a mathematical overview, Mathematical methods for ab-initio quantum chemistry (Nice, France, october 2009)
- Some nonlinear dynamics in computational statistical physics, ICNAAM 2009 (Rethymno, Greece, september 2009)
- Some adaptive dynamics in computational statistical physics, ICMS workshop "Adaptivity, robustness and complexity of multiscale algorithms" (Edinburgh, United-Kingdom, March 2009)
- Nonequilibrium computation of free energy differences: some new algorithms, Banff meeting on "Numerical methods for free energy computations" (Canada, June 2008)
- Computation of free energy differences, Oberwolfach meeting "Atomistic models of materials" (Germany, April 2008)
- A reduced stochastic model for shock waves, IMA Summer Program Classical and quantum approaches in molecular modeling (Minneapolis, USA, August 2007)
- A simplified one-dimensional model for shock and detonation waves, Sixth Biennal International Conference on New models and hydrocodes for shock waves processes in condensed matter (Dijon, France, April 2006)
- (Non)equilibrium computation of equilibrium properties, ACI meeting - CIRM (Marseille, France, January 2006)
- Computing macroscopic properties using microscopic models, GdR CHANT meeting (Grenoble, France, January 2006)
- (Non)Equilibrium computation of free energy differences, Lake Arrowhead - IPAM culminating workshop (California, USA, December 2005)
- Workshop on Atomistic models and their continuum limits (Berlin, Germany, December 2003)

Oral presentations in seminars

- Quantifying the mini-batching error in Bayesian inference for Adaptive Langevin dynamics (Parisian seminar of statistics, March 2023)
- Coarse-graining and efficiently sampling with autoencoders, Materials Innovation Factory seminar (online, February 2023)
- Numerical methods for the linear response of nonequilibrium stochastic dynamics, Probability seminar, Université de Rennes (June 2022)
- Machine learning for coarse-graining molecular systems, Data Science and Computational Statistics Seminar, University of Birmingham (October 2021)
- Computation of transport coefficients in molecular dynamics: methods and numerical analysis, One World Stochastic Numerics and Inverse Problems seminar (online, July 2021)
- Hypocoercivity without changing the scalar product, Probability seminar, University of Bristol (online, May 2021)
- Longtime convergence of some diffusion processes in molecular dynamics, Probability seminar, University of Delaware (online, April 2021)
- Finding reaction coordinates with machine learning techniques for free energy computations, MPI Polymer Research public seminar (online, January 2021)
- Computation of transport coefficients in molecular dynamics: methods and numerical analysis, University of Massachussetts (April 2020)
- Linear response of nonequilibrium stochastic dynamics, ACM seminar, University of Edinburgh (Feburary 2020)

- A mathematical introduction to molecular dynamics, MAC-MIGs students seminar Edinburgh (February 2020)
- Linear response of nonequilibrium stochastic dynamics, Probability group seminar, University of Bonn (January 2020)
- Convergence of Adaptive Langevin (and other dynamics) using hypocoercivity, Applied PDEs seminar Imperial College London (October 2019)
- Convergence of Adaptive Langevin (and other dynamics) using hypocoercivity, Université Paris-Dauphine (October 2019)
- Error estimates in molecular dynamics, DEFI/MEDISIM/POEMS seminar, Inria Saclay (July 2019)
- Hybrid Monte Carlo methods for sampling probability measures on submanifolds, Maths/chemistry seminar EMC2, Sorbonne-Université (June 2019)
- Convergence and approximation of Langevin like dynamics, MAP5 Colloquium, Université Paris Descartes (June 2019)
- Longtime convergence of evolution semigroups in molecular dynamics, Mathematical Physics Seminar, Institut Henri Poincaré (March 2019)
- Error estimates in molecular dynamics, Inria/LJLL seminar, Paris (December 2018)
- Hybrid Monte Carlo methods for sampling on submanifolds, Courant Institute of Mathematical Sciences, New York (October 2018)
- Sampling with stochastic differential equations: a primer, SMILE [Statistical Machine Learning in Paris] seminar, Paris (April 2018)
- Langevin dynamics at equilibrium and out of equilibrium: from hypocoercivity to efficient sampling, Duke University (February 2018)
- Mathematical analysis and numerical schemes for dissipative dynamics like models, ETH Zürich (February 2018)
- (Non)equilibrium Langevin dynamics: convergence and numerical approximation, University of Geneva (March 2017)
- (Non)equilibrium Langevin dynamics: convergence and numerical approximation, University of Massachussetts (February 2017)
- A mathematical introduction to some coarse-grained stochastic dynamics, Army Research Laboratory, Aberdeen Proving Ground (February 2017)
- Langevin dynamics with space-time periodic nonequilibrium forcing, University of Lille (September 2014)
- The computation of averages from equilibrium and nonequilibrium Langevin dynamics, AMMP seminar, Imperial College London (October 2013)
- Numerical simulation of Langevin dynamics, CEMRACS 2013 (August 2013)
- The microscopic origin of the macroscopic dielectric permittivity of crystals, Mathematical Physics Seminar, Institut Henri Poincaré (May 2013)
- Time evolution of defects in crystals, Collège de France (June 2012)
- Computation of transport properties by molecular dynamics, University of Edinburgh (February 2012)
- A mathematical understanding of the random phase approximation, Université de Cergy (October 2011)
- Adiabatic switching for degenerate ground states, Université de Lille (June 2009)

- Adaptive Importance Sampling (and applications to Bayesian statistics), BigMC seminar, Paris (June 2009)
- Adiabatic switching for degenerate ground states, IMA seminar on mathematics and chemistry, Minneapolis (May 2009)
- A mathematical introduction to statistical physics, Université de Strasbourg (February 2008)
- (Non)equilibrium computation of free energy differences, University of Warwick (February 2007)
- (Non)equilibrium computation of free energy differences, Seminar of the Computational Chemistry group at university of Amsterdam (June 2006)
- Out-of-equilibrium sampling, Meeting "Scientific computation" at université de Cergy (March 2006)
- A simplified one-dimensional model for shock and detonation waves, seminar Materials and Simulation Process Center (Caltech, November 2005)
- Theoretical and numerical comparison of some sampling methods in molecular dynamics, Presentation at the IPAM seminar (Los Angeles, September 2005)

General audience talks and presentations

- TV science show "On n'est pas des cobayes" (France 5) on trajectories of fireworks (Paris, October 2015)
- TV science show "On n'est pas des cobayes" (France 5) on pendulum waves (Paris, April 2015)
- Computer Simulations: The third way of doing science, ICMS (Edinburgh, June 2014)
- Les ordinateurs remplaceront-ils les expériences de laboratoire ?, Salon Culture et jeux mathematiques (Paris, Mai 2011)

Posters

- Sampling constraints in average: The example of Hugoniot curves, Poster presented at CANUM, Carcans-Maubuisson, France (june 2010)
- Adaptive importance sampling strategies, poster presented at the IPAM workshop "Rare Events", UCLA (february 2009) and workshop "Molecular Simulations", IMA, Minneapolis (may 2009)
- Thermal transport in isotopically disordered carbon nanotubes: does the conductivity exist?, Poster presented at the Nanotubes'08 conference, Montpellier (july 2008)
- Local exchange potentials: A mathematical viewpoint, Poster presented at the Summer program "Classical and Quantum Approaches in Molecular Modeling", Minneapolis (2007)
- Path sampling with stochastic dynamics, Poster presented at the workshop "Sampling paths in molecular simulation: algorithms for phase transitions, reactivity and kinetics", Orsay (november 2006)
- A simplified dual formulation of the electronic problem in terms of the second order reduced density matrix, Poster presented at the International Congress on Quantum Chemistry, Kyoto (may 2006)
- Equilibrium computation of free-energy differences using non-equilibrium methods, Poster presented at the workshops "Multiscale Modeling in Soft Matter and Bio-Physics" and "Time acceleration methods in molecular dynamics" at IPAM, Los Angeles (october 2005)

Grants and contracts

2023-2028	project MAMABIO, PEPR B-Best
2022-2025	P.I. of ANR SINEQ (efficient simulation of nonequilibrium stochastic dynamics)
2020-2023	IFPEN contract on the development of machine learning techniques for catalytic mechanisms
2018-2021	Sanofi contract on the development of machine learning techniques for finding reaction coordinates
2016-2017	P.I. of EARO contract on the development of numerical schemes for coarse-grained dynamics
2014-2017	Contract with CEA/DAM on smoothed dissipative particle dynamics
2014-2018	P.I. of ANR COSMOS (numerical techniques for computational statistics and molecular simulation)
2013-2016	Contract with CEA/DAM on multiscale methods for the simulation of shock waves

Scientific animation

March-May 2024	Co-organization of the program "Data-Driven Materials Informatics" at IMSI, University of Chicago
September 2023	Co-organization of the research school "Sampling high dimensional probability measures" (Ecole des Ponts)
June 2023	Co-organization of the minisymposium "Numerical methods in statistical physics" at MCM2023 (Paris)
June 2022	Co-organization of a CECAM workshop on "Chasing CVs using Machine Learning: from methods development to biophysical applications"
May 2021	Co-organization of a mini-symposium at SIAM "Materials Science" 21 on "Computational Statistical Physics and Related Fields"
2018-2020	Co-organization of the working group "Machine learning and optimization" (Labex Bezout)
December 2018	Co-organization of the CECAM discussion meeting "Coarse-graining with machine learning in molecular dynamics" (Gentilly, France)
November 2018	Co-organization of the workshop "Computational Statistics and Molecular Simulation: A Practical Cross-Fertilization" (BIRS, Oaxaca)
September 2018	Co-organization of the workshop "Advances in Computational Statistical Physics" (CIRM, France)
April-July 2017	Co-organization of the IHP Trimester "Stochastic dynamics out of equilibrium" (Paris, France)
February 2016	Co-organization of the workshop "Computational statistics and molecular simulation" (Paris, France)
June 2014	Co-organization of the workshop "Computational methods for statistical mechanics - at the interface between mathematical statistics and molecular simulation" (ICMS, Edinburgh, United-Kingdom)
November 2012	Co-organization of the workshop "Nonequilibrium Statistical Mechanics: Mathematical Understanding and Numerical Simulation" (Banff, Canada)
September 2012	Co-organization of a CFCAM discussion on "Numerical methods and mathematical approaches for solar devices" (Paris, France)
November 2011	Co-organization of the workshop "Interactions between PDEs and probability theory" in the framework of the GdR CHANT (Grenoble, France)
May 2011	Co-organization of the mini-symposium "Numerical methods in molecular simulation" (SMAI 2011, Guidel, France)
September 2010	Co-organization of the workshop "Simulation of hybrid dynamical systems and applications to molecular dynamics" (IHP, Paris, France)
April 2008	Co-organization of the workshop "Mathematical methods for molecular simulation" (HIM, Bonn, Germany)
2005-2007	Co-organization of the seminar "Scientific computing" at CERMICS, ENPC

Scientific responsibilities

2022-	Member of the Executive Board of GdR IAMAT (Artificial Intelligence and Materials Science)
2021-	Member of the Faculty Board of EELISA
2019-	Elected member of the Teaching and Research Council of Ecole des Ponts
2015-	Member of the scientific council of UNIT (Université Numérique Ingénierie et Technologie)
2014-	Head of the team "Modeling, analysis and simulation" at CERMICS
Journal refereeing	Adv. Comput. Math., AMRX, Ann. Appl. Probab., Ann. Henri Poincare, Ann. IHP Proba. Stat., Applied Math. Lett., Archive Rat. Mech. Anal., Bernoulli, Chem. Phys. Lett, Commun. Comput. Phys., Commun. Math. Phys., Commun. Math. Sci., Commun. Pure Appl. Math., Discrete Contin. Dyn. Syst. B, Entropy, Found. Comput. Math., ESAIM Proc., EPJ, J. Chem. Phys., ESAIM-Math. Model. Num., IMA J. Numer. Anal., J. Chem. Theor. Comput, Journal of Computational Dynamics, J. Comput. Phys., J. Mach. Learn. Res., J. Math. Phys., J. Maths Pure Appl., J. Roy. Stat. Soc. A & B, J. Stat. Phys., JSTAT, Lett. Math. Phys., Mol. Simul., Nonlinearity, Phys. Chem. Chem. Phys., Phys. Rev. Lett., Phys. Rev. A, Phys. Rev. E, Physica D, PNAS, Probab. Theor. Rel. Fields, Proc. Roy. Soc. A, Pure and Applied Analysis, Questionaes Mathematicae, RapidRechLett, Sci. Rep., SIAM J. Imaging Sciences, SIAM Multiscale Model. Simul., SIAM J. Numer. Anal., SIAM Rev., SIAM J. Sci. Comput., SIAM UQ, Stat. Comput., Stoch. Proc. Appl.
Grant refereeing	ERC (Europe), ANR (France), DFG (Germany), Millenium (Chile), NWO (Netherlands)

Participation to juries

September 2023	PhD thesis of Thimotée Devergne, Sorbonne Université (referee)
Spring 2023	Recruitment jury for research position at Sorbonne Université
Spring 2023	Recruitment jury for research position at Ecole des Ponts
November 2022	PhD thesis of Paul Rohrbach, University of Cambridge (referee)
April 2022	PhD thesis of Benjamin Stottrup, Aalborg University (referee)
March 2022	PhD thesis of Lorenzo Campana, Inria Sophia (referee)
February 2022	PhD thesis of Clovis Lapointe, Ecole Centrale Lille (referee)
December 2021	PhD thesis of Lorenz Richter, BTU Cottbus (referee)
December 2021	PhD thesis of Robert Benda, Ecole polytechnique
July 2021	PhD thesis of Louis Thiry, ENS Ulm (president)
Spring 2021	Participation to the selection for PhD fellowships of the Udopia program at Université Paris-Saclay
April 2021	PhD thesis of Anne-Francoise Lempereur de Guerny, Sorbonne Université (referee)
February 2020	PhD thesis of Anton Martinsson, University of Edinburgh (referee)
December 2019	PhD thesis of Nadia Jbili, Université Paris-Dauphine (referee)
Fall 2019	PhD thesis of Nada Cvtekovic, FU Berlin (referee)
June 2019	PhD thesis of Laurent Laflèche, Université Paris-Dauphine
June 2019	PhD thesis of Nicolas Brosse, Ecole polytechnique (referee)
December 2018	PhD thesis of Sabri Souguir, Université Paris Est
December 2017	PhD thesis of Viviana Letizia, Université Paris Dauphine (referee)
October 2017	PhD thesis of Romain Poncet, Ecole polytechnique (referee)
Spring 2016	Recruitment jury for research positions at Inria Paris
June 2014	PhD thesis of Marie Kopec, ENS Rennes (referee)

Supervision of postdoctoral researchers

2019-2020	Geneviève Robin (funded by Inria Paris)
2020-2021	Urbain Vaes (funded by FSMP)
2022-2023	Mohamad Rachid (funded by ANR QuamProcs)

PhD supervisions

2013-2016	Ahmed-Amine Homman Numerical integration of reduced stochastic dynamics for the simulation of shock waves
2013-2016	Zofia Trstanova (co-supervised with Stéphane Redon, Inria Grenoble) A mathematical analysis of some importance sampling strategies in molecular dynamics
2011-2017	Alessandra Iacobucci (co-supervised with Stefano Olla; PhD work completed beside her full time job as research engineer) Nonequilibrium stationary states of rotor and oscillator chains
2014-2017	Gérôme Faure Multiscale methods for the simulation of shock and detonation waves
2015-2018	Pierre Terrier Numerical simulations for predicting the microstructural evolution of ferritic alloys. A study of Cluster Dynamics.
2015-2018	Julien Roussel Theoretical and numerical analysis of non-reversible dynamics in computational statistical physics
2016-2019	Grégoire Ferré (PhD prizes 2020 from Université Paris Est, and Ecole des Ponts) Large deviations theory in statistical physics: some theoretical and numerical aspects
2016-2019	Lingling Cao (co-supervised with Eric Cancès) Mathematical analysis of models of electronic structure for defected materials
2018-2022	Zineb Belkacemi (co-supervised with T. Lelièvre) Deciphering protein function with artificial intelligence
2019-2022	Inass Sekkat Large scale Bayesian inference
2020-	Thomas Pigeon (co-supervised with T. Lelièvre and P. Raybaud) Machine learning approaches for catalytic reactions
2021-	Renato Spacek (co-supervised with P. Monmarché; funding from FSMP) Efficient computation of linear response of nonequilibrium stochastic dynamics
2021-	Régis Santet (co-supervised with T. Lelièvre) Enhancing the sampling efficiency of reversible and non-reversible dynamics
2022-	Shiva Darshan (co-supervised with S. Olla) Linear response of constrained stochastic dynamics
2022-	Noé Blassel (co-supervised with T. Lelièvre) Mathematical and numerical approximation of quasi-stationary distributions

Internship supervisions

2023	Pierre Marmey (ENS Lyon, 5 months), on implementation of Adaptive Multilevel Splitting in OpenMM
2022	Noé Blassel (Sorbonne University, 6 months), on constrained stochastic dynamics in nonequilibrium systems
2021	Remi Delloque (Ecole Normale Supérieure Lyon, 2.5 months), on hypocoercivity
2021	Shiva Darshan (Ecole polytechnique, 4 months), on coupling techniques for sensitivity estimates
2018	Ghita El-Himdi (ENSTA, 2 months), on large scale Bayesian inference
2015	Grégoire Ferré (ENPC, 6 months industrial internship), on machine learning techniques to compute potential energies in molecular dynamics
2013-2014	Julien Roussel (ENPC, 1 year industrial internship), on the coupling of SPH and molecular dynamics
2012-2013	Gérôme Faure (ENPC, 1 year industrial internship), on density dependent potentials in molecular dynamics
2012-2013	Pierre Terrier (ENPC, 1 year industrial internship), on numerical methods for the computation of shear viscosisites
2012-2013	Ahmed-Amine Homman (ENPC, 3rd year internship), on the computation of surface tension
2012	Yoann Robin (Paris 6, Master ANEDP, 4 months), on numerical analysis of periodic Schrödinger operators
	Theophile Lambert (ENPC, first year of training, 3 months), on numerical methods in nonequilibrium statistical physics
2011	Laura Da Silva (Paris 7, Master 1 in biology (AIV), 2 months)
	Etienne Germain (ENPC, first year of training, 3 months), on numerical methods in computational statistical physics
2009	Vincent Dardel (UPMC, Master 1 in applied mathematics, 6 months)
	Quentin Carbonneaux (Ecole des Ponts, first year of training, 3 months), on a numerical method to solve the Schrödinger equation
2008	Ronan Costaouec (ENPC, Master 2 in applied mathematics, 3 months), on canonical sampling at fixed entropy
	Sophia Chami, Pierre Lesouhaitier, Alexis De Maack and Dimitry Sculy (ENPC, first year of training, 3 months), on models and methods for heat transport in one dimensional systems
2007	Emmanuel Maruani (ENPC, first year of training, 3 months), on a reduced model for shock waves
	Nicole Spillane (ENPC, first year of training, 3 months), on effective dynamics
2006	Yann Tréguer (ENPC, first year of training, 3 months), on sampling techniques for molecular dynamics
	(with Eric Cancès) Moncef Elacheche (Orsay, Master in applied mathematics, 4 months), on the computation of Optimized effective potentials in quantum chemistry
2005	(with Eric Cancès) Daniel Cai, Pierre-Emmanuel Beluche and Bertrand Fan (ENPC, first year of training, 3 months), electronic structure computations using Hartree-Fock methods

Teaching

2023-	"Introduction to Machine Learning" Institut polytechnique Paris, M1 Applied mathematics and statistics
2023-	"Mathematics in action" Ecole Nationale des Ponts et Chaussées, Marne-la-Vallée
2018-	"Statistics and Data Science" Ecole Nationale des Ponts et Chaussées, Marne-la-Vallée
2022-2023	"Basics of analysis" Ecole Nationale des Ponts et Chaussées, Marne-la-Vallée
2015-2022	"Analysis and Scientific computing" Ecole Nationale des Ponts et Chaussées, Marne-la-Vallée
2015-	"Introduction to computational statistical physics" Master Mathématiques et application, spécialité Mathématiques et modélisation, Sorbonne-Université (ex-ANEDP, Paris 6)
2015-2018	"Maths1 & Maths2" (lectures on numerical methods only) Ecole des Mines, Paris
2016-2017	"Fourier Analysis" Ecole Nationale des Ponts et Chaussées, Marne-la-Vallée
2011-2015	"Introduction to scientific computing" Ecole des Mines, Paris
2008-2015	"Spectral theory and Fourier transform" Ecole Nationale des Ponts et Chaussées, Marne-la-Vallée
2006-2015	"Scientific computing" Ecole Nationale des Ponts et Chaussées, Marne-la-Vallée
2006-2022	"Statistical physics and quantum physics" (projects) Ecole Nationale des Ponts et Chaussées, Marne-la-Vallée
2011-2014	"Spectral theory of Schrödinger operators", Master 2 at Université de Marne-la-Vallée
2012	"Analysis" Ecole Nationale des Ponts et Chaussées, Marne-la-Vallée
2008-2010	Molecular Simulation, Master SMCD
2005	"Scientific computing and optimization" ESIEE, Marne-la-Vallée

Studies in pedagogy
