

Gabriel Stoltz

French nationality.
Born 27th may 1979.
Married, 1 child

Personal address:
46 rue de Lagny
75020 Paris
FRANCE
Tel.: +33 6 31 68 91 98
email: stoltz@cermics.enpc.fr
Web page: <http://cermics.enpc.fr/~stoltz>

Professional address:
CERMICS - Ecole des Ponts ParisTech
6/8 av. Blaise Pascal - Cité Descartes
77455 Marne-La-Vallée
FRANCE
Tél. : +33 1 64 15 35 20

Positions & Education

september 2008 -	Researcher at CERMICS (Ecole des Ponts ParisTech, France) & MICMAC project, INRIA
2007-2008	Post-doc at IMPMC, University Paris 6 Numerical methods for quantum thermal transport (supervised by Francesco Mauri)
2004-2007	PhD in applied mathematics “Some mathematical methods in molecular simulation” Advisor: Eric Cancès, CERMICS
2002 - 2004	Ecole Nationale des Ponts et Chaussées, Marne-La-Vallée MS in Numerical Analysis, Université Paris VI
1999 - 2002	Ecole polytechnique, Paris specialization in Mathematics

Scientific Experience

2008 (1 month)	Junior program “Computational Mathematics” (HIM, Bonn, Germany)
2005 (3 months)	Program “Bridging time and length scales in materials science and biophysics” (IPAM, UCLA, Los Angeles, USA)
2004 (6 weeks)	Summer School CEMRACS (Marseille, France). <i>Field of research:</i> Conformational molecular dynamics in drug design. <i>Supervisor:</i> Eric Cancès.
2003 - 2004 (8 months)	Training period in industry (CEA, French Atomic Energy Authority). <i>Field of research:</i> Upscaling issues in molecular dynamic simulations of shock waves. <i>Supervisor:</i> Claude Le Bris.
2002 (3 months)	Final training period of the Ecole polytechnique, at the ETH Zürich. <i>Field of research:</i> Hardy Spaces and some applications to the Euler equation. <i>Supervisor:</i> Tristan Rivière.

Languages

English	fluent
German	fluent

Computer Skills

Programing languages	C/C++, Scilab/Matlab, Maple

Conference proceedings

- F. LEGOLL, T. LELIÈVRE AND G. STOLTZ, Some remarks on sampling methods in Molecular Dynamics, Proceedings of CANUM 2006, *ESAIM Proc* **22** (2008) 217-233

Oral presentations (conferences)

- Computational statistical physics: a mathematical overview, Mathematical methods for ab-initio quantum chemistry (Nice, France, october 2009)
- Some nonlinear dynamics in computational statistical physics, ICNAAM 2009 (Rethymno, Greece, september 2009)
- Some adaptive dynamics in computational statistical physics, ICMS workshop “Adaptivity, robustness and complexity of multiscale algorithms” (Edinburgh, United-Kingdom, march 2009)
- Nonequilibrium computation of free energy differences: some new algorithms, Banff meeting on “Numerical methods for free energy computations” (Canada, june 2008)
- Computation of free energy differences, Oberwolfach meeting ” Atomistic models of materials” (Germany, april 2008)
- A reduced stochastic model for shock waves, IMA Summer Program Classical and quantum approaches in molecular modeling (Minneapolis, USA, august 2007)
- A simplified one-dimensional model for shock and detonation waves, Sixth Biennial International Conference on New models and hydrocodes for shock waves processes in condensed matter (Dijon, France, april 2006)
- (Non)equilibrium computation of equilibrium properties, ACI meeting - CIRM (Marseille, France, january 2006)
- Computing macroscopic properties using microscopic models, GdR CHANT meeting (Grenoble, France, january 2006)
- (Non)Equilibrium computation of free energy differences, Lake Arrowhead - IPAM culminating workshop (California, USA, december 2005)
- Workshop on Atomistic models and their continuum limits (Berlin, Germany, december 2003)

Oral presentations in seminars

- Adiabatic switching for degenerate ground states, Université de Lille (june 2009)
- Adaptive Importance Sampling (and applications to Bayesian statistics), BigMC seminar, Paris (june 2009)
- Adiabatic switching for degenerate ground states, IMA seminar on mathematics and chemistry, Minneapolis (may 2009)
- A mathematical introduction to statistical physics, Université de Strasbourg (february 2008)
- (Non)equilibrium computation of free energy differences, University of Warwick (february 2007)
- (Non)equilibrium computation of free energy differences, Seminar of the Computational Chemistry group at university of Amsterdam (june 2006)
- Out-of-equilibrium sampling, Meeting "Scientific computation" at université de Cergy (march 2006)
- A simplified one-dimensional model for shock and detonation waves, seminar Materials and Simulation Process Center (Caltech, november 2005)
- Theoretical and numerical comparison of some sampling methods in molecular dynamics, Presentation at the IPAM seminar (Los Angeles, september 2005)

Posters

- Adaptive importance sampling strategies, poster presented at the IPAM workshop "Rare Events", UCLA (february 2009) and workshop "Molecular Simulations", IMA, Minneapolis (may 2009)
- Thermal transport in isotopically disordered carbon nanotubes: does the conductivity exist?, Poster presented at the Nanotubes'08 conference, Montpellier (july 2008)
- Local exchange potentials: A mathematical viewpoint, Poster presented at the Summer program "Classical and Quantum Approaches in Molecular Modeling", Minneapolis (2007)
- Path sampling with stochastic dynamics, Poster presented at the workshop "Sampling paths in molecular simulation: algorithms for phase transitions, reactivity and kinetics", Orsay (november 2006)
- A simplified dual formulation of the electronic problem in terms of the second order reduced density matrix, Poster presented at the International Congress on Quantum Chemistry, Kyoto (may 2006)
- Equilibrium computation of free-energy differences using non-equilibrium methods, Poster presented at the workshops "Multiscale Modeling in Soft Matter and Bio-Physics" and "Time acceleration methods in molecular dynamics" at IPAM, Los Angeles (october 2005)

Teaching

2010	“Scientific computing” Ecole des Ponts ParisTech, Marne-la-Vallée
2009	“Scientific computing” and “Spectral theory and Fourier transform” Ecole Nationale des Ponts et Chaussées, Marne-la-Vallée Molecular Simulation, Master SMCD
2008	“Spectral theory and Fourier transform”, Ecole des Ponts et Chaussées “An introduction to computational statistical physics”, Stage LIESSE Molecular Simulation, Master SMCD
2007	“Statistical physics and quantum physics” and “Scientific computing” Ecole Nationale des Ponts et Chaussées, Marne-la-Vallée
2006	“Scientific computing” Ecole Nationale des Ponts et Chaussées, Marne-la-Vallée
2005	“Scientific computing and optimization” ESIEE, Marne-la-Vallée

Internship supervisions

2009	Vincent Dardel (UPMC, Master 1 in applied mathematics, 6 months) Quentin Carbonneaux (Ecole des Ponts, first year of training, 3 months), on a numerical method to solve the Schrödinger equation
2008	Ronan Costaoeuc (ENPC, Master 2 in applied mathematics, 3 months), on canonical sampling at fixed entropy Sophia Chami, Pierre Lesouhaitier, Alexis De Maack and Dimitry Sculy (ENPC, first year of training, 3 months), on models and methods for heat transport in one dimensional systems
2007	Emmanuel Maruani (ENPC, first year of training, 3 months), on a reduced model for shock waves Nicole Spillane (ENPC, first year of training, 3 months), on effective dynamics
2006	Yann Tréguer (ENPC, first year of training, 3 months), on sampling techniques for molecular dynamics (with Eric Cancès) Moncef Elacheche (Orsay, Master in applied mathematics, 4 months), on the computation of Optimized effective potentials in quantum chemistry
2005	(with Eric Cancès) Daniel Cai, Pierre-Emmanuel Beluche and Bertrand Fan (ENPC, first year of training, 3 months), electronic structure computations using Hartree-Fock methods

Scientific animation

April 2008	Co-organization of the workshop “Mathematical methods for molecular simulation” (HIM, Bonn, Germany)
2005-2007	Co-organization of the seminar “Scientific computing” at CERMICS, ENPC
